25X1

1. Production in February 1954 (quantities given in metric tons)

a. Gasoline (Vergaserkraftstoff)	7,361
b. Alkylate (A.T.)	3,048
c. Jet fuel (Mittelbenzin)	9,621
d. Diesel fuel	3,279
	<u>23,309</u>

2. Inventory at the Boehlen plant on 1 March 1954 (quantities given in metric tons)

a. Gasoline	10,443
b. Alkylate	2,151
c. Jet fuel	4,479
d. Diesel fuel	3,032
	<u>20,105</u>

3. During February 1954, one of the contact chambers, which had been operating poorly for a long time because of the difficulty of replacing worn out parts, finally had to be taken out of use. This caused a reduction in output that will be very difficult to offset, for there appears little chance of building or acquiring new plant. The Winkler (gas) producing plant is not operating well because of its age.
